

Honda's AI-Based Automatic Inspection System "IDC Intelligent Driving Circuit" for SSDC as a worldwide first installation in Singapore

IDC revolution enables to achieve **Vision Zero** of an industry-wide level-up. **Honda** will establish a **new global standard for traffic safety education in Singapore** through the operation of this innovative IDC and disseminate this technology worldwide.

What is IDC?

- IDC is a system that **moves beyond traditional subjective evaluations** reliant on human judgment, achieving objective and fair assessments through AI and digital technology
- IDC contains two main advanced digital technologies; **Digital Twin** and **AI Automatic Evaluation**

Resolve the shortage of instructors and Achieve Uniformity in Educational Quality

This system is a groundbreaking solution that utilizes AI and high-precision sensors to automatically assess driving skills with **"99.99% accuracy."**

IDC will bring the Digital Revolution in Driving Instruction of;

- IDC is a system that moves beyond traditional subjective evaluations reliant on human judgment, achieving objective and fair assessments through AI and digital technology.
- ✓ **Digital Twin:** Sensor networks embedded in the course and vehicles capture complete real-time data on behaviors such as steering, braking, and safety checks.
 - ✓ **AI Automatic Evaluation:** Algorithms trained on the expertise of seasoned evaluators instantly determine pass/fail results and provide improvement feedback. This simultaneously addresses instructor shortages and standardizes educational quality.

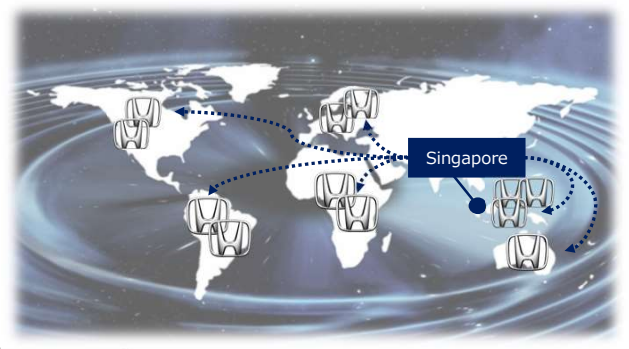

Industry-wide level up

- The concentrated strengths unique to an original equipment manufacturer (OEM) will Dramatically improve learning efficiency

Covered by a single system	For all Motorcycles, Automobiles, and Heavy Vehicles
Vehicle Integrated Control	Advanced analytical capabilities that detect even the earliest signs of abnormal behavior
Instant feedback	Immediately after driving, visualize "why points were deducted"

From Singapore to Worldwide

- Singapore will be the leader of this New Global Standard for Traffic Safety Education for Worldwide Expansion

Rather than keeping it exclusively within our company, We aim to promote this technology to driving schools and related organizations both domestically and internationally
